### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/3/2004 has been entered.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17-24 and 39 are rejected under 35 U.S.C. 102 (b) as being anticipated by Buirge et al (U.S. 5,693,085).

Regarding claims 17-20 and 39, Buirge et al disclose in fig 7, a stent graft for insertion into target site within a vessel of a patient, including: a main stent (10) has a radially-expandable body, at least one support stent (15), and a sheath (12) between the body, and the support stent where no portions of the main stent are in contact with the support stent, and the sheath is not bonded to the support stent. Note that the support stent in fig. 7 can generate a force with the main stent to hold the sheath in place

Art Unit: 3731

Regarding claims 18-20, Buirge et al disclose the support stent (15) is capable of plastically deformed (see col.6, lines 19-47). The sheath (12) disposes radially outwardly or inwardly of the stent.

Regarding claims 21-22, Buirge et al disclose the support stent has an axial length which is less than the axial length of the body (fig.7).

Regarding claims 23-24, Buirge et al disclose sheath is selected from the group consisting of a polymeric/a biomaterial sleeve (see col. 5, lines 10-60). The sheath is also treated with a drug selected from the group consisting of biocompatible material (see col. 5, lines 32-67).
